The supplied Bank 67 1.2V VCCO rail has a limited user capacity of 250mA. Care must be taken using this rail as any noise coupled into it could have effects on the behavioral performance of the DDR.

Bank 67 is hard wired to 1.2V_DDR VCCO so it does not require VIO to be up, which can make PERST function faster for PCIE Tandem boot. However the bank is not present on the AU10/15/20P.
